

NanoScrub™

Removal of Protective Wax Coatings
from Porcelain Tile

NanoScrub™

- **Powerful Abrasive Cleaner**
- **Removes Ground in Dirt from Textured Surfaces**
- **Removes factory applied waxes & floor finishes**
- **Removes epoxy and cement grout haze**
- **Safe on polished marble**
- **Breakthrough NanoSTG™ Technology**

Protective Wax Coating On Porcelain Tile

Step 1: Pre-Wet Surface

Step 2: Add neat NanoScrub directly to surface

Step 3: Agitate with Doodle Bug for small areas

For large areas use a low rpm (175) scrubbing machine with a white nylon pad

Step 4: Check to see if wax is completely removed

Step 5: Remove with wet/dry vac

Step 6: Rinse with clean water and re-vac

Final Result
