

## Sealer & Coating Remover Product Trouble Shooter

**How it works:** The Aqua Mix Product Trouble Shooter covers the most common application issues and problems associated with each Aqua Mix product. These are compiled from phone calls received by our technical department from all over the world.

**Problem:** If the product problem you are experiencing is not covered by the guide then it is most likely something that is job specific. Therefore please contact Aqua Mix directly for more detailed advice and information.

**Solutions:** The solutions described are not necessarily the only way to solve the specific problem. However they are based on giving you the most efficient and direct solution without resorting to more complex solutions that may require a professional. If the solutions outlined do not solve the problem it is most likely job specific. Therefore please contact Aqua Mix directly for more detailed advice and information.

**Note:** Please read the full product label before using any product and observe the Test Area instruction noted on all labels.

Problem	Reason	Solution
Does not strip coating.	<ul style="list-style-type: none"> <li>• Not enough product.</li> <li>• Not enough dwell time.</li> <li>• A sealer or coating that cannot be stripped with this product.</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Increase product and or dwell time or boost with Aqua Mix NanoScrub and hot water.</b></li> <li>• <b>Use more aggressive solvent.</b></li> </ul>
Visible residue left on surface after stripping. Floor streaky.	<ul style="list-style-type: none"> <li>• Sealer or coating not totally stripped.</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Reapply more product and or increase dwell time.</b></li> <li>• <b>Use wet and dry vacuum to totally remove sealer residue.</b></li> <li>• <b>Boost Sealer and Coating Remover with Aqua Mix NanoScrub (add after dwell time) and hot water for difficult to remove sealers or coatings.</b></li> </ul>
Damaged my paint, vinyl floor or carpet.	<ul style="list-style-type: none"> <li>• Solvents will damage paint, vinyl, and other types of synthetic materials.</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Use the appropriate solvent resistant protection where required.</b></li> </ul>
